PROFILE

AI/LLM Engineer with 1+ year of experience building and deploying production NLP and AI systems across LLM inference, semantic search, embeddings, candidate matching, and AI-driven ranking. Hands-on experience deploying open-source LLMs on NVIDIA DGX Spark using vLLM and Docker, migrating production vector search to Qdrant, and building FastAPI-based AI services. Experienced in taking AI systems from experimentation and evaluation through production deployment and optimization.

TECHNICAL SKILLS

AI/ML: LLMs, NLP, Transformers, Hugging Face, PyTorch, Embedding Models, Semantic Search, RAG, Prompt Engineering, Model Evaluation

LLM Infrastructure: vLLM, NVIDIA DGX Spark, Docker, Ollama, Model Serving, Quantization, FastAPI, Linux

AI Systems: Qdrant, Elasticsearch, MongoDB, Neo4j, RabbitMQ, Vector Search, Retrieval Pipelines, AI/ML Pipelines

Backend: Python, FastAPI, REST APIs, Node.js, Express.js, Git/GitHub

Frontend: React.js, Next.js, Tailwind CSS

EXPERIENCE

SproutsAI

June 2025 – Present

AI/LLM Engineer (Intern → Full-Time)

Remote, India

- Deployed and benchmarked open-source LLMs (Phi-4, Qwen2.5-72B AWQ, Qwen3.5-35B MoE) on NVIDIA DGX Spark via vLLM + Docker, evaluating against Gemini across resume parsing, candidate scoring, and email generation to finalize production deployment.
- Diagnosed inflated match scores caused by scoring logic scattered across services; redesigned the Match Parser into a single pipeline with policy-driven, evidence-based scoring, cutting false positives by 40% – design approved by SproutsAI's senior technical advisor.
- Expanded autosourcing beyond existing ATS/database sources by integrating web-search agents and Google Search, and added must-have/nice-to-have ranking logic, cutting the volume of low-quality matches recruiters review by 40%.
- Built a GitHub enrichment agent that identifies a candidate's technical skills with confidence scores backed by repo- and commit-level evidence, and cross-references it to surface their portfolio site and resume.
- Designed and implemented a candidate filtering pipeline consolidating 8+ quality signals (4 logical filters, 3 LLM-driven smart labels) across autosourcing and enrichment, reducing irrelevant profiles reaching recruiters by 30%+.
- Executed a zero-downtime production migration of vector search from MongoDB to Qdrant across 5 NLP repositories handling 10K+ daily queries, and deployed a FastAPI/Docker-based embedding service (Hugging Face SentenceTransformer) with backward-compatible validation.

Care Automate

Dec 2024 – May 2025

Full-Stack Developer Intern

Remote, India

- Developed React.js frontend and Express.js backend with MongoDB; built and productionized Speech-to-Text and document extraction pipelines, integrating AI models into backend services while optimizing for real-world latency.

PROJECTS

QEventGraph – Event-Graph Framework for Quantum Program Observability

GitHub

FastAPI, Neo4j, Qiskit, NetworkX, Next.js, React 19, Cytoscape.js

- Designed event-graph observability framework for quantum programs enabling non-intrusive execution replay; built dual-relationship graph model (NEXT + QUBIT_DEP) processing 1000+ events with O(n) complexity.
- Implemented full-stack system with FastAPI + Neo4j backend and interactive React/Cytoscape.js frontend; developed divergence analysis comparing noisy vs ideal executions using Qiskit Aer.

Spendlytic AI – AI-Powered Finance Analyzer

GitHub

Next.js, Neon DB, Gemini AI, Clerk, ShadCN, Tailwind CSS

- Built an AI-powered finance analyzer using Gemini with retrieval-based context injection and prompt-grounded workflows to generate user-specific financial insights.

EDUCATION

B.Tech in Computer Science and Engineering (Honors in AI & ML)

2022 – 2026

Vishnu Institute of Technology (VITB), Bhimavaram, AP

CGPA: 9.11/10

Intermediate (MPC)

2020 – 2022

Sasi Junior College, Rajahmundry

93.8%

ACHIEVEMENTS & CERTIFICATIONS

GDG HackATron 2025: 4th place among 100+ teams for an NLP-powered sports management solution

Hackathons: DeMux Hackathon – Special Appreciation (EdTech NLP); Smart India Hackathon Finalist (2023, 2024)

Certifications: Deep Learning with PyTorch (IBM/edX); Programming with Generative AI (NPTEL); AWS Cloud Practitioner
